

Overview

MultiPad is a community-governed decentralized multi-chain powered launchpad, enabling upcoming promising projects to raise funds. Binance Smart Chain/ Polygon/ Solana/ Avalanche/ Cardano were chosen as the underlying blockchain to allow for low-cost and high-speed transactions starting with Binance Smart Chain implementation.

As our tagline stands, at MultiPad, we are fully committed to our strong community and every decision is taken by keeping the interest of the community in mind. This is the sole reason why strategic investment groups and Venture Capitalists will pay the same token price as our IDO investors. We want to ensure that the concentration of power (to vote/stake/win launchpad lotteries) is not in the hands of early investors getting MPAD at low prices, to the detriment of our community's interests.

Token Utilities

 **Launchpad Access via lottery**  **Staking**  **Governance Voting**

Lottery Mechanics

- 1) To be eligible to participate in the upcoming IDOs, one has to stake a certain amount of MPAD tokens in order to gain 1 lottery ticket 24 hours before the IDO. Unstaking MPAD would need 5 days and disqualify the lottery ticket from the IDO with no staking rewards for these 5 days.
- 2) In order to make sure that everyone has a fair chance at winning, a cooldown mechanism will be incorporated for every successful IDO win. Details of which will be announced in future.
- 3) The exact amount of MPAD tokens required per ticket and staking reward APY will be announced soon.

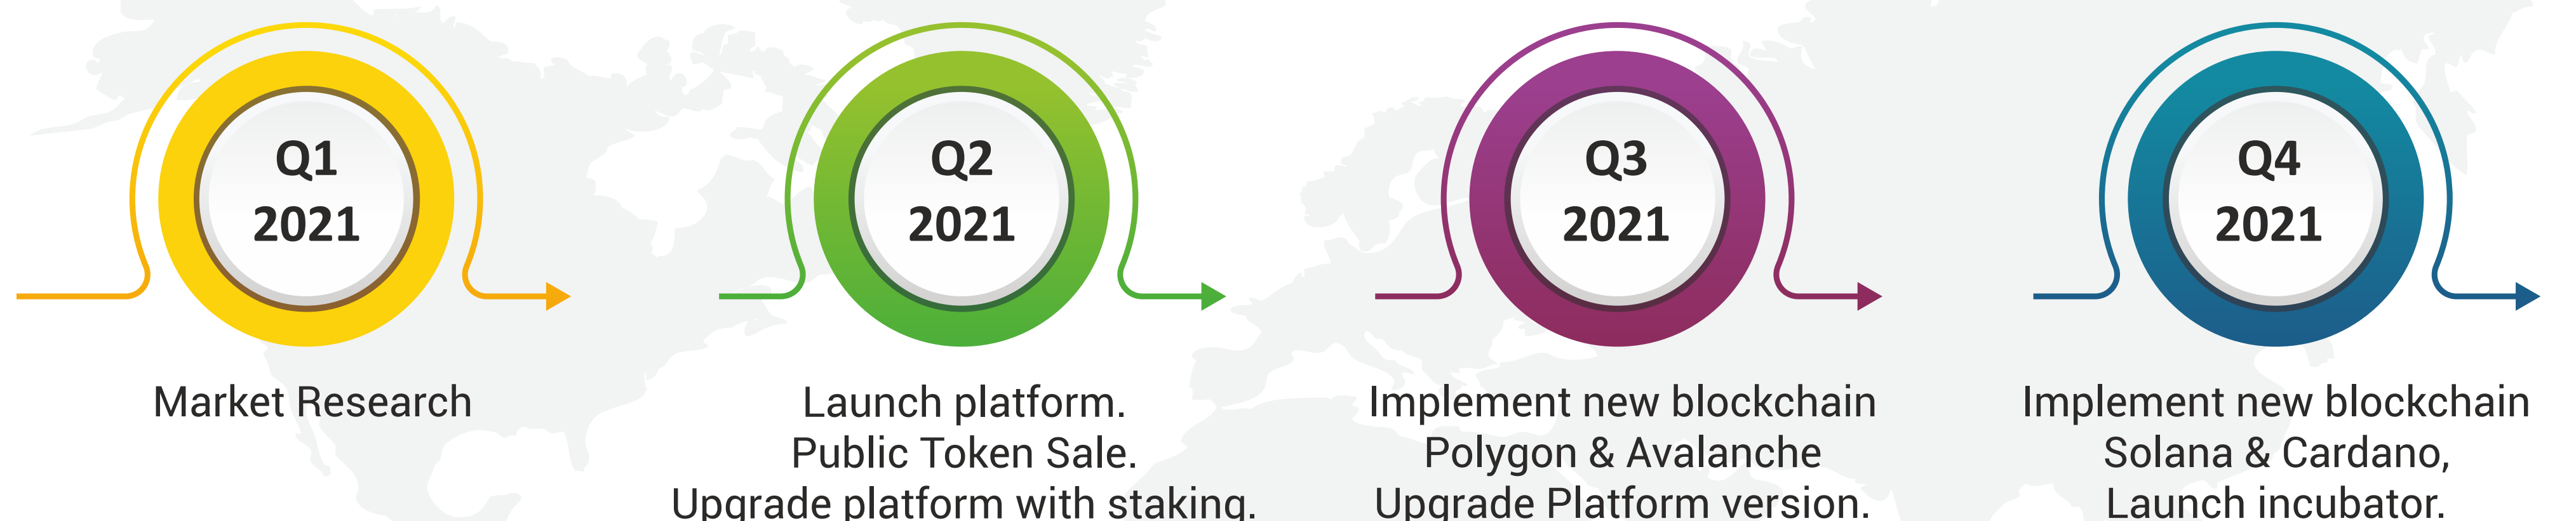

Token Generation Event Details

Ticker:	MPAD	Initial Circulating supply:	9,750,000 MPAD
Total Fundraise:	\$1,250,000	Market cap at launch:	\$487,500
IDO price:	\$0.05
